2. The following is an examiner's statement of reasons for allowance:

Claim 1 and its respective dependent claims are allowed because the prior art alone or in combination with fails to disclose, teach or suggest a fingerprint temperature sensor that includes power source for cooling or heating the fingerprint sensor according to a direction of a current from the power source; and a controller controlling the power source based on the fingerprint sensor temperature wherein the semiconductor assembly comprises an n-type semiconductor, a p-type semiconductor, an electrode for conjunction between the n-type semiconductor and the p-type semiconductor, two counter electrodes respectively connected to the power source in series, and an intermediate element for heat transfer between the electrode and the fingerprint sensor, in combination with the other limitations of the claim.

Claims 8-15 and their respective dependent claims are allowed because the prior art alone or in combination with fails to disclose, teach or suggest a fingerprint temperature sensor that includes applying a reverse bias current from the power source to the

semiconductor assembly when the sensed temperature is higher than the predetermined range; and supply a forward bias current from the power source to the semiconductor assembly when the sensed temperature is lower than the predetermined range, in combination with the other limitations of the claim.
